

SAFE STORAGE

Did you know?

- Thousands of road incidents occur due to debris and other objects falling from vehicles.
- It is an offence and drivers face prosecution when using a vehicle or trailer on a road if it involves a danger of injury to any person.
- Drivers face fines up to £2,500 and three penalty points if any part of the load is unsafe/insecure or the vehicle is overweight.

Always use a suitable vehicle when transporting loads and equipment.

Ladders and equipment carried on the exterior of a vehicle must be adequately secured to avoid incidents when driving.

When driving on the road, listen out for rattling as this may suggest that the ladder and equipment are not secured tightly enough. Pull over into a safe area to check the security of the equipment and adjust as needed.

Do not take risks when transporting equipment on the exterior of a vehicle, as it can be illegal and dangerous.

Best practice tips:

- Check any ladders or equipment are fully folded up and any locking mechanisms are properly engaged before driving.
- Ladders should be secured at both the front and back using ladder clamps, padlocks, bungee cords, ropes, or other strong ties.
- It is important to know and stay within the maximum overhang limits on both the front and back of a vehicle.
- Take a short test drive in a safe area with the ladder and equipment in place on the vehicle, turning sharp corners and braking abruptly to ensure they are securely in place.
- Ensure there are no loose items – everything should be fixed, strapped down or covered.
